Objective

Enthusiastic and motivated Junior MERN Stack Developer with a passion for creating innovative and efficient web applications. Eager to leverage skills in JavaScript, React, Node.js, and MongoDB to contribute to dynamic development projects while continuously learning and growing in a collaborative team environment.

Projects

Todo-app

Description: Developed a web application utilizing React.js and Node.js to enhance task management efficiency. Executed user authentication, CRUD operations, and task categorization functionalities.

YouTube Clone Project

Description: Engineered a web application replicating YouTube's functionalities using React, Redux, and an external API, specifically Rapi API.

e-shop

Description: Designed and developed an e-commerce platform using React for the frontend and Node.js with Express.js for the backend, integrated with MongoDB for database management.
